ACTION COALITION ON FEMINIST ACTION FOR CLIMATE JUSTICE

VISION

By 2026, FAC J will have initiated a transition to an inclusive and regenerative green economy that recognizes the **interconnectedness of climate change with issues of gender justice** and **protects and amplifies the voices of grassroots and indigenous communities**, including frontline defenders, across social and political arenas.

Women and girls in their full diversity **equitably and meaningfully participate in decision-making processes at all levels**, including in aligning key climate policy instruments with national development plans and **developing climate responses that center human rights.**

Financing institutions and the donor community reframe risk, **prioritize women's organizations as priority partners**, and are held accountable to **shift capital to support resilient societies and transformative investments** in gender-just climate and ecosystem-based approaches.

Women and girls in their full diversity **equitably access climate finance, technologies and knowledge**, and access and control natural resources for management and protection, including through **securing land rights and ownership.**

WHAT NEEDS TO CHANGE?

Just **3% of philanthropic environmental funding** supports women's and girls' environmental activism.

Despite their major role in the agricultural sector, women hold **less than 15% of land globally.**

Women and girls are **underrepresented in advancing climate justice** across all levels and sectors, from national to community-level planning, in the public sector, climate finance, and clean energy.

Climate interventions **fail to adequately account for women's and girls' realities in climate crises**, such as violence, healthcare needs, fraught economic resilience, and unpaid care and domestic work.

Women and girls comprise **less than a third** of total students enrolled in educational fields informing the green jobs approach.

INCREASE DIRECT ACCESS TO FINANCING FOR GENDER-JUST CLIMATE SOLUTIONS, IN PARTICULAR FOR WOMEN AND GIRLS AT GRASSROOTS LEVELS

ACTION

By 2026, increase the percentage of global climate finance flows, public and private, directed towards and invested in gender-just climate solutions in particular at grassroots and rural levels, including through an increase to 88% in the proportion of marked climate bilateral finance targeted towards gender.

ENABLE WOMEN AND GIRLS TO LEAD A JUST TRANSITION TO A GREEN ECONOMY

ACTION

Increase the proportion of women and girls in decision-making and leadership positions throughout climate and environmental governance and sectors relevant for transitioning to an inclusive, circular and regenerative green economy by 2026.
